NOISE IMMISSION

NEW
WHAT CONFORTSONIC DOES FOR YOUR NEIGHBOURS

The new CONFORTSONIC® not only thinks about you but also about the well-being of those around you. It prevents complaints and issues with your neighbors by reducing the noise limits established by Acoustic Legislation in Spain (37/2003) and municipal ordinances by almost 25%.*

*The limit established by municipal ordinances in most CCAA is 40dBA. On-site tests were conducted at Naturvita facilities in Elche by EUROCONTROL, a company accredited by: ENAC. According to impact standards: UNE-EN ISO 717-2:2013 and UNE-EN ISO 16283-1:2015, and between-room standards: UNE-EN ISO 717-1:2013 and UNE-EN ISO 16283-2:2016.
